### **DETAILED ACTION**

The specification is required to have a section regarding a brief description of the drawings

#### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-1-17 and 19-21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is unclear what a precursor of stream I or II comprises.

In claim 1, it is unclear if the steps pertaining to withdrawal of the reaction mixture gas and liquid streams pertains to the mixing of streams I and II or the carbonylation of methanol.

In claim 1, it is unclear what the difference is between liquid side stream III and reaction mixture liquid stream IV.

The claim should not contain the terms "in particular" or preferably, see for example, claim 4. In that case it is unclear what molar ratio applicant intends to cover. See also claim 11, for example.

A search of the prior art failed to uncover a reference that teaches the instant process, or provides a basis to modify a known process to include the step introducing

the liquid stream III into an acid formate process, much less a stream III prepared from a process for preparing MeFo by carbonylating MeOH.. For example, DE 10210730 is a conventional process in that art, but fails to teach the instant process, or provide a basis to modify it disclosure to include the step introducing the liquid stream III into an acid formate process, much less a stream III prepared from a process for preparing MeFo by carbonylating MeOH.
